

AI ADVANCED

AI Mastery: Level 3 - Automation

A 3-Week, Hands-On Program to Build Real AI Automations & Agents

n8n Automation • AI Agents • Real Working Project

Duration 3 Weeks	Course Fee ₹5,999	Mode Offline, Aligarh
----------------------------	------------------------------------	---------------------------------

International Institute of Online Learning | iiol.online

Why Join AI ADVANCED?

This is where AI stops being a tool you use manually and becomes a system that works for you. This program teaches you to build real automated workflows and AI agents using n8n - connecting forms, WhatsApp, Sheets and AI together - so you leave with a working AI agent you built yourself.

Who Can Join

- Students who've completed AI Intermediate (or are tech-comfortable)
- BCA/MCA & Tech Students
- Freelancers & Consultants
- Business Owners wanting to automate operations
- Marketers wanting automation skills

Program Highlights

- Zero Theory - 100% Practical, Hands-On Learning
- Build Real Automated Workflows with n8n
- Learn to Build Working AI Agents
- Connect WhatsApp, Sheets, Forms & AI Together
- Certificate of Completion

Tools You Will Use

- | | | |
|----------------|------------------------|-----------------|
| ● n8n | ● ChatGPT / Claude API | ● Google Sheets |
| ● Google Forms | ● WhatsApp API | ● Webhooks |

Day-by-Day Curriculum

DAY 1	What is Automation? • Understanding automation - concept, logic & real-world examples • Where businesses use automation to save time • Overview of the course journey ahead
DAY 2	Introduction to n8n • n8n interface walkthrough: triggers, actions & nodes • Understanding how data flows through a workflow • Hands-on: exploring the n8n canvas
DAY 3	Building Your First Workflow • Building a simple workflow: form submission to Google Sheets • Testing & troubleshooting your first automation
DAY 4	Data Flow & Node Types • Understanding different node types & when to use them • Working with data between steps in a workflow • Hands-on: extending your first workflow
DAY 5	Week 1 Recap & Mini Project • Building a complete simple workflow independently • Recap quiz + doubt-clearing session
DAY 6	What is an AI Agent? • Understanding AI agents - concept & real use cases • Difference between a simple automation and an AI agent • Live demo: a working AI agent in action
DAY 7	Multi-Step Workflows & Branching Logic • Building workflows with If/Else branching • Handling multiple possible outcomes in one workflow • Hands-on: build a branching workflow
DAY 8	AI Nodes - Lead Scoring • Using AI nodes to automatically score incoming leads • Setting up scoring logic within a workflow • Hands-on: build a lead-scoring step
DAY 9	AI Nodes - Auto-Reply Drafting • Using AI to draft automatic replies to messages/emails • Reviewing & refining AI-drafted responses • Hands-on: build an auto-reply workflow
DAY 10	Week 2 Recap & Agent Practice • Combining lead scoring + auto-reply into one workflow • Recap quiz + doubt-clearing session
DAY 11	Connecting WhatsApp to n8n • Setting up WhatsApp as a trigger/action in a workflow • Hands-on: sending a WhatsApp message via automation
DAY 12	Connecting Google Sheets & Forms • Integrating forms & Sheets into a complete pipeline • Hands-on: end-to-end data flow test
DAY 13	Portfolio Project - Build • Starting your Portfolio Project: an AI auto lead-reply bot • Mentor support while building

DAY 14

Portfolio Project - Testing & Debugging

- Testing your AI agent with real sample data
- Debugging & fixing workflow errors

DAY 15

Final Presentation & Certification

- Presenting your working AI agent to the batch
- Certificate distribution & Q&A

Get Certified

On successful completion, you will receive IOL's **AI Mastery: Level 3 Certificate**, along with a working AI agent you built yourself as proof of skill.
